

We at Abbey electrical were proud to complete this high-end Bistro and residents lounge for a large provider of UK retirement homes. The spec was to create a well illuminated yet homely area that residents of the retirement village could use to entertain guests or as an area to relax within during the day. There were numerous facilities and amenities within the space including a 4K Smart TV with digital sound bar and a coffee station. Modern energy efficient panel heaters were installed throughout the area to ensure the space was kept at a warm comfortable level for guests. There were several additions to make the space suitable for use for older people, high luminance LED lighting was installed to keep the area illuminated clearly and a hearing loop was installed throughout the room linked to the sound bar to enable people with hearing aids to hear the TV clearly. Another high-end project delivered by Abbey Electrical.

New Bistro and Residents Lounge

**Category of Job:
Commercial**

**Contract Value:
£10,000**
